What is Data Science?

What is data science?

Data science is the generalization of the scientific method

Why is data science new?

Data science is a “new” discipline because

- 1. of an abundance of data outside of the traditional sciences**
- 2. of tools to investigate these data**

Model as a Hypothesis

Use these data to create a model.

The Scientific Method

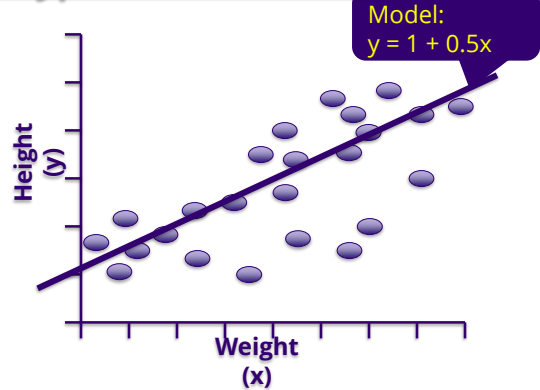

Model as a Hypothesis

The thick line is a model that represents the ideal data

The Scientific Method

Model as a Hypothesis

The line can be formalized. The model is the formalized statement.

Examples of data in Traditional Sciences:

- Planetary motions
- Reaction Rate of Chemicals
- Genome Sequence

Examples of models in Traditional Sciences:

- $F = m \cdot a$
- Molecular Models
- Breast Cancer Probability

Data Science

Examples of data in Data Science:

- Twitter Feeds
